## Muhammad Ali Center **Case Study**

Cliff Slater

Large Multi-Server Deployment for International Peace Museum

Headquartered in Louisville, Kentucky the Muhammad Ali Center serves as an international cultural, education and communications center that is inspired by the ideals of its visionary founders Muhammad and Lonnie Ali.

The Muhammad Ali Center turned to MaximumASP in advance of their grand opening to underwrite and support their entire technology structure. MaximumASP deployed, installed and configured hardware and platform software for fourteen Windows 2003 dedicated servers. The systems supported include their website, integrated classroom learning, gift shop purchases, archived digital media, mail systems and active directory.
