

Dedicated Servers

Multiple configurations and one powerful solution: The MaximumASP Dedicated Server Platform gives you the hosting platform you need with options that work within your budget.

MaximumASP offers seven different configurations of dedicated servers to meet your Windows and .NET hosting needs. Hosted on our multi-tiered Enterprise Class network, these servers provide the performance, security and reliability you need to host your high-end web sites and applications.

Whether you need an entry-level web server to run your web application, or a high-end application or database server, one of our configurations will meet your needs. We offer:

- Enterprise Firewall, Intrusion Prevention and Anti-Virus included!
- 99.999% Guaranteed Network Uptime
- Complete Service Pack and Critical Patch Management
- Secure, managed servers starting at \$199/month!

MaximumASP provides comprehensive network protection, automated server patching and advanced server monitoring with all servers. Add this to our basic services with award-winning support from knowledgeable, experienced MSCE engineers and developers and you get a hosting experience you won't find anywhere else.

Dedicated Server Pricing

MaximumASP offers competitive pricing for add-on services and enterprise software, allowing customers to take advantage of our savings on hardware, component licensing and bandwidth. Low startup costs and monthly fees that are among the best on the market provide a dedicated server solution that will work within your budget.

Model	Processor	RAM	Hard Drive	SQL	Bandwidth	Monthly

B100	Dual Core 1.86 GHz	1GB	2x80 SATA RAID 1	200MB	500GB	\$249
B100Q	Quad Core 2.13 GHz	1GB	2x80 SATA RAID 1	200MB	500GB	\$299
B200	2xDual Core 1.8 GHz	1GB	2x80 SATA RAID 1	200MB	500GB	\$299
E100D	Dual Core 1.86 GHz	1GB	2x73 SAS 10k RAID 1	500MB	1000GB	\$369
E200D	2xQuad Core 1.6GHZ	1GB	2x146 SAS 10k RAID 1	500MB	1000GB	\$429
E300D	2xQuad Core 1.6GHZ	2GB	3x146 SAS 10k RAID 5	500MB	1000GB	\$499

Features

- **Dell Hardware**

Dell hardware is engineered to keep critical enterprise applications running around the clock with clustered solutions fully tested and certified by Dell and other leading operating system and application providers.

- **Control Panel**

Written entirely in .NET, MaximumASP provides one of the most comprehensive customer control panels available. Providing maximum control and ease of use, our Control Panel serves as the central management point for your MaximumASP account.

- **Data Center**

MaximumASP's modular data center was specifically designed to be a world-class web hosting facility totally dedicated to uncompromised performance and security.

- **Network**

MaximumASP has architected its network like no other hosting company. Every facet of our network infrastructure scales to gigabit speeds with no single point of failure.

- **Security**

Network security and the security of your server are MaximumASP's top priorities. Our security team is constantly monitoring the entire network for unusual or suspicious behavior so that when it is detected we can address the issue before our network or your server can be affected.

- **Support**

Engineers staff our data center 24 hours a day, 7 days a week, 365 days a year to manage the network infrastructure and oversee top-of-the-line servers that host our clients' critical sites and services.

MaximumASP
smart hosting.
smart choice.
