

## Dedicated SQL Server

Dedicated SQL Servers provide enhanced performance, reliability, and dedicated resources for your application. MaximumASP provides Dedicated SQL Servers to web developers, enterprises, and organizations needing advanced support and functionality. With a full team of Database Administrators a Dedicated SQL Server will provide you with both the robust database functionality and expert support you need.

### Guidelines for High-Availability Dedicated Servers

MaximumASP recommends hosting Dedicated SQL Servers on separate hardware for security and top performance. Dedicated SQL Servers applications require intensive resources such as CPU and RAM. MaximumASP offers custom solutions for your web and SQL Dedicated Server needs.

With the release of Microsoft SQL Server 2005 new features and versions are available.

### Features of Dedicated SQL 2005 Servers

- SA Rights to SQL 2005
- Full Text Search
- XML Data Types
- XQuery
- SQL Studio Manager
- Stored Procedure Support
- T-SQL Enhancements
- Multiple Active Result Set (MARS)
- Triggers
- SQL Login Password Reset Tool

**Dedicated SQL Server support** is available from our team of DBA's for just \$99 a month and includes:

- Set up and monitor system and user database backups
- Set up and monitor index optimizations
- Set up and monitor database integrity checks
- Set up and monitor database usage statistics
- Monitor SQL Server and SQL Server Agent Services
- Provide support with problems related to the above services
- SQL Server Sentry Monitoring

MaximumASP offers competitive pricing for add-on services and enterprise software, allowing customers to take advantage of our savings on hardware, component licensing and bandwidth. Low startup costs and monthly fees that are among the best on the market provide a dedicated server solution that will fit within your budget.
